This App is a very useful tool for the student and instructor in keeping track of the Behind the Wheel driving lessons. It will show the students' drive schedules and keep track of the progress students are making on their way to becoming good drivers. Also it will provide a comprehensive report on specific driving maneuvers reviewed in the Behind the Wheel training. This App will show specific areas students need to improve. Students learn more about driving while they are actually out on the road.. experiencing hands-on training and real-life situations. Sure the classroom environment helps them learn the different signs and rules of the road, but the actual Behind the Wheel training is very important in producing safe drivers. You will find our series of animated instructional videos to be very useful in teaching driving maneuvers. The videos are designed to help teach driver education while the student is behind the wheel of the vehicle, preparing to perform a specific driving maneuver. What makes this App so unique is that you can show the instructional demonstration videos right from your smart phone or tablet. What better place and time for new drivers to see the proper way to handle driving maneuvers, than in the vehicle just before actually practicing these maneuvers? Additionally, this App connects the Student/ Parent with the Instructor during the driver training process. And, this App, along with parental guidance, supports the continuing education it takes to help drivers in training become good drivers.
